

[KET4CleanProduction:](#)

Objective | To foster the use of advanced manufacturing technologies and related key enabling technologies (KET) by Small and Medium Enterprises (SME) to upgrade their production processes toward resources – energy efficiency and sustainability.

Platform | A dedicated community, in the framework of the EU-funded project KET4CleanProduction, which aims to establish an open innovation ecosystem to develop innovative solutions for cleaner production processes throughout Europe.

Target groups | The community focuses on the following main stakeholder groups:

- ☆ **Manufacturing Small and Medium-sized Enterprises (SMEs)**
- ☆ **KET Technology Centers (KET TCs)**
- ☆ **Enterprise Europe Network (EEN) partners and Business support organizations (BSO)**

Functionalities | The [ket4sme.eu platform](#) :

- offers a specialized and active support in the field of advanced manufacturing and key enabling technologies matching SMEs with research technology organization active in the field of KET service/providers;
- serves as a complementary matching tool to MERLIN for KET;
- supports EEN's mission to generate partnership profiles, advisory services outcomes, transnational partnership agreements;

Reasons to join the [ket4sme.eu platform](#):

- become part of a strong international KET4CP network;
- stay informed about news on micro grants for transnational KET projects;
- profit from a single access point for transnational innovation service in clean production;

Reasons for EEN partners to join the [ket4sme.eu platform](#)

- ⇒ **improve** your capacity by providing value – added services and knowledge to their clients in the field of key enabling technologies;
- ⇒ **facilitate** transnational partnership agreements between your local manufacturing SMEs with the best matching KET expert EU-wide;
- ⇒ **access funding** for SMEs across Europe (micro grants of 50k EUR);
- ⇒ **learn** on the best practices on how SMEs can benefit from multi-KET service know-how and infrastructure;
- ⇒ **benefit** from a matching tool linking manufacturing SMEs with KET technology centers cross-borders.

Stay up-to-date at all times!
